## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to a cigarette filter, classified in class 131, subclass 331.
- II. Claim 26-31, drawn to a method of manufacturing a filter, classified in class 493, subclass 39.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the capsule for use as a filter in the instant application can be used in an air purification device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

~~Because these inventions are distinct for the reasons given above and the~~  
search required for Group I is not required for Group II, and vice versa, restriction for examination purposes as indicated is proper.

A telephone call was made to Jack Hicks on July 19, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
